

# Florida real estate exam 14-day, 7-day, and 48-hour sprint calendars

A compressed study-plan sheet for candidates who need a shorter runway and cannot afford to treat every topic equally.

CUT SCOPE	DRILL WEAK POINTS	PROTECT SLEEP
<p><b>14 DAYS</b></p> <p><b>Cut scope</b></p> <p>A sprint is not a full course plan. Keep the work that protects the most points.</p>	<p><b>7 DAYS</b></p> <p><b>Drill weak points</b></p> <p>Choose brokerage, contracts, mortgages, math, relationships, or whatever your data says is leaking.</p>	<p><b>48 HOURS</b></p> <p><b>Protect sleep</b></p> <p>Use formulas, trap words, and the exam-day checklist. No new content rabbit holes.</p>

## Sprint map

WINDOW	MAIN JOB	WHAT TO CUT
<b>14 days</b>	Diagnose fast, repair top weak topics, take two timed exams	Long chapter rereading
<b>7 days</b>	Drill highest-weight weak areas, math setups, and wording traps	Low-weight topics you already know
<b>48 hours</b>	Light review, formulas, EXCEPT/NOT, exam-day checklist	New content and late-night full exams

**QUICK SELF-TEST**

### Can you choose what to cut?

Cover the answer key first. If you miss two or more, simplify the sprint before adding more tasks. Short windows reward sharp cuts.

**MORE PRACTICE:** [PASSFLORIDAREALESTATE.COM/PASS-RATE-CALCULATOR](https://PASSFLORIDAREALESTATE.COM/PASS-RATE-CALCULATOR)

- 1 **WARM-UP**  
What is the main rule for a short study window?
- 2 **14-DAY**  
What should a 14-day sprint still include if possible?
- 3 **7-DAY**  
In a 7-day plan, should you prioritize weak high-weight topics or comfortable low-weight topics?
- 4 **48-HOUR**  
What should the final 48 hours avoid?
- 5 **READINESS**  
If timed scores are still unstable, what should your sprint emphasize?

**ANSWER KEY: SPRINT DECISION**

- 1 **Answer: Short windows require sharper cuts**  
You cannot cover everything equally when time is compressed.
- 2 **Answer: Diagnosis, repair, and timed proof**  
Two weeks is short, but still enough to measure and repair.
- 3 **Answer: Weak high-weight topics**  
Point protection matters more than comfort.
- 4 **Answer: Brand-new content and late-night full exams**  
Use formulas, trap words, logistics, and sleep protection.  
Trap watch: panic studying can make known topics worse.
- 5 **Answer: Weakest repeat miss patterns**  
Use the miss pattern, not the calendar, to choose the next drill.

## Sprint traps

TRAP	WRONG MOVE	REPAIR
<b>Cover everything</b>	Treats a short runway like a full course plan	Cut scope aggressively
<b>Low-weight comfort</b>	Polishes easy low-weight topics	Drill weak high-weight topics
<b>New content panic</b>	Starts brand-new material in the last 48 hours	Use light review and trap checks
<b>Sleep sacrifice</b>	Trades sleep for one more late practice exam	Protect attention for test day
<b>No proof point</b>	Never checks timed readiness	Use one realistic timed block when the window allows
